How Can ASEAN Universities Thrive in the Next Decade?

ASEAN grew to be one of the most important regions globally for good reasons. Almost half of the world's seaborne trade passes through this region, including a quarter of all oils. It has the third-largest labor force, behind only China and India. Just over a decade ago, almost 80% of people in the region had no internet access; today, ASEAN has the most engaged mobile internet users in the world.

The future of the ASEAN region is young, optimistic, and complicated. One-third of its 655 million population is youth, a key ingredient to ensure sustained economic growth. It is geographically and economically important to both the East and West, and its people have a unique cultural understanding of both sides. It benefits from multilateralism but is increasingly challenged by growing protectionism. It has been one of the fastest-growing regions, but its unequal development is also concerning.

A thriving higher education system that trains skilled workers and explores the frontier of human knowledge is critical for ASEAN. As the region rapidly becoming the rising center of traditional supply chains, there is a vast and urgent need for more skilled laborers and experienced managers. Meanwhile, the Fourth Industrial Revolution built on Artificial Intelligence and Automation is rapidly making

many occupations obsolete. Higher education institutions in the region play an essential role in making sure the young generation is not only competitive in today's global job market but also ready for tomorrow's innovations and disruptions.

This DAU webinar on ASEAN university will be joined by three top ASEAN university leaders. The speakers are Professor Dr. Bundhit Eua-arporn, President of Chulalongkorn University, and Professor Dato' Ir Dr Mohd Hamdi Abd Shukor, Vice-Chancellor of Universiti Malaya, and the moderator is DAU co-founder, Professor Tan Eng Chye, President of the National University of Singapore.

SPEAKERS

Professor Dr. Bundhit Eua-arporn
President, Chulalongkorn University

Professor Bundhit Eua-arporn is the President of Chulalongkorn University and Professor of Electrical Engineering. He is a member of APRU Steering Committee, and a former Executive President of Asian Universities Alliance (AUA). Professor Eua-arporn received his B.Eng. and M.Eng. from Chulalongkorn University, and Ph.D. from Imperial College, London.

Professor Dato' Ir Dr Mohd Hamdi Abd Shukor

Vice-Chancellor, Universiti Malaya

Professor Shukor is the Vice-Chancellor of Universiti Malaya and Professor of Mechanical Engineering. Previously, he was the Vice-Chancellor of Universiti

Kebangsaan Malaya from 2019 to 2020. Professor Shukor received his B.Eng. from Imperial College, London, M. Sc. from the University of Manchester, and Ph.D. from Kyoto University.

MODERATOR

Professor Tan Eng Chye

President, National University of Singapore

Professor Tan is the President of National University of Singapore and Professor of Mathematics. He is the Chair of Universities 21, a leading global network of 27 research-intensive universities, and is a

member of the Singapore's Future Economy Council.

Professor Tan received his B.S. from NUS and Ph.D. from Yale University.
