

25th

K-STP

TRAINING PROGRAM

OCT 30 - NOV 10, 2023

Korea Innovation Foundation (INNOPOLIS)

letter of invitation

Greetings!

We are delighted to extend to you a warm and cordial invitation for the forthcoming K-STP (Korea-Science & Technology Park) Training Program proudly hosted by the Korea Innovation Foundation.

The Korea Innovation Foundation is a government agency under the Ministry of Science and ICT of Korea, serving as a vital catalyst for the advancement of the science and technology park ecosystem. Our mission encompasses fostering the commercialization of public R&D outputs, supporting technology-based startup enterprises, and overseeing key infrastructures. In addition, we manage significant facilities, including 5 Innopolis.

Since our inception in 1973, we have been at the forefront of pioneering science and technology park development, starting with Daedeok Innopolis. Over the past five decades, our commitment has remained unwavering, and we are eager to share our extensive knowledge about constructing and operating Korean-style science parks, along with a comprehensive understanding of technology commercialization.

A testament to our dedication, the K-STP Training Program has been successfully conducted from 2008 to 2022, empowering 494 alumni from 73 countries. This year, we are excited to reintroduce the offline K-STP Training program, aiming to strengthen partnerships within the realm of science parks and drive collaborative projects into action. For those intrigued by the concept of Science & Technology Parks (STP), this program holds immense potential, offering valuable insights and growth opportunities.

We kindly offer our support to cover essential aspects, including accommodation, transportation, meals, and travel insurance. Please understand that flight tickets and visa fees are not included in this coverage.

We kindly implore you to help us spread the word about this enriching workshop, encouraging the participation of organizations with shared interests.

With warm regards,

Byung-sam Kang

President
Korea Innovation Foundation
